Rodon International B.V. is a Dutch based company. With a team of enthusiastic employees we have more than 30 years of experience in the poultry processing spare parts industry. Therefore we have become a reliable worldwide partner for this industry.

Our experience and knowledge of equipment enables us to adapt and customize parts to react to market needs and your specific demands. The wide and extensive range of OEM compatible parts, competitive pricing and high standards makes Rodon International a trusted partner in the business.

Rodon International is the one stop shop for poultry processing spare parts.

Our extensive program of gizzard harvester peeler rollers, pinch-off rolls, gut gears and related spare parts like bearing blocks, carrier chains and circular blades makes us not only a supplier of poultry spare parts but an active partner in your business.

With our extensive knowledge regarding the lifetime of these critical parts, we can also make recommendations as to which of these parts should be kept on hand in your storage facilities.

To minimize your production downtime we can deliver many of our products directly from stock anywhere in the world. Products are continuously being developed and improved.

Material knowledge and modern production equipment in combination with the problem solving capabilities of our employees, continuously results in new opportunities. Rodon International is not only supplier of poultry spare parts but an active partner in your business.

It's our pleasure to serve you in all your spare part requirements.  
Please feel free to contact our head office or one of our regional business agents.
