Rodon International B.V. is a Dutch based company. With a team of enthusiastic employees we have more than 30 years of experience in the poultry processing spare parts industry. Therefore we have become a reliable worldwide partner for this industry.

Our experience and knowledge of equipment enables us to adapt and customize parts to react to market needs and your specific demands. The wide and extensive range of OEM compatible parts, competitive pricing and high standards makes Rodon International a trusted partner in the business.

Rodon International is the one stop shop for poultry processing spare parts.

Rodon International has a wide range of high quality blade and knife products in its delivery program. Our range of blades and knives is internationally well-known. Circular blades with diameters ranging from 60mm up to 400mm made of high alloy steels, straight knives, vent blades, in various sizes are available from stock. Our short delivery times and technical advice are key.

To minimize your production downtime we can deliver many of our products directly from stock anywhere in the world. Products are continuously being developed and improved.

Material knowledge and modern production equipment in combination with the problem solving capabilities of our employees, continuously results in new opportunities. Rodon International is not only supplier of poultry spare parts but an active partner in your business.

It's our pleasure to serve you in all your spare part requirements.  
Please feel free to contact our head office or one of our regional business agents.
